About Metalux

Metalux GmbH was officially established on 2011 as a German company. During past decade, Metalux has been focused on Lighting calculation, Offering Quality Luminaires to Industrial and Petrochemical projects. Our full commitment to product quality, durability, performance, and project orientation are some of outstanding features offered by Metalux. Our commitment to continuous improvement makes Metalux as one of the lighting challengers to invest in new technology, machinery, tooling and high-quality components. In Addition to its own production lines in Middle east, in order to serve better in terms of lead time, shipment and delivery to projects, Metalux has developed a network of Quality manufacturers around the world to make sure that affordable products are available within a reasonable time zone.

Metalux outstanding features:

IMS certified by DQS Germany (ISO 9000, ISO 14000, ISO 18001)

ATEX certified EEx products

All produced and supplied Metalux luminaires are manufactured according to International standard to International standards IEC 60598 and IEC 62722-2-1

Lighting solution and project oriented

Precise quality control

weatherproof Series

When it comes to Industrial and Environments with high quality demands, choosing a weatherproof Luminaire with IP65 and above is always a concern. It means the products are well-protected against water jets and dust, making them suitable for both indoor and outdoor applications. The fixture is tightly sealed to prevent any ingress, and the electrical connections and components are shielded from external elements. Through the upcoming pages, we will introduce Metalux range of weatherproof products to our valued customers.

MONO Light

weatherproof Series

- **MONO Light**

MONO Light Luminaires are designed to be mounted in Outdoor, Industrial Areas, moisture zones, Parking places, Utility areas and Sub stations.

Special design of Mono Light enables the End Users to apply this product in Parking Places, Utility areas as well as Walkways. High efficiency, Smooth and homogenic light Distribution, Glare control, with a quality and professional selection of fine Electrical components are just a few remarkable features of Mono Light.

- **Certificates**

IP65
IK08

- **Housing**

Made of Extruded Aluminum Profile with excellent resistant against heavy Mechanical and Heat Shocks. Coating by automatic powder coating system RAL 7015 End Caps made of powder coated Die Cast Aluminum

- **Diffuser**

Made of Extruded Polycarbonate Profile Sealants made of silicon gasket with premium durability to ensure IP maintenance in life time zone

- **Electrical components**

Fine quality Constant current LED Driver, Flicker Free, PF>0.9
Internal wiring made of PVC covered copper wires
Screwless Terminal Block made of Polycarbonate
Fine Quality SMD-LED module, nominate life time 100.000 hours at L70 with excellent efficiency
Color Temperature CCT 4000 K (6000 K as an Option by Order)

- **Nominated Voltage and Frequency**

220-240 V. AC
50-60 HZ

- **Entries**

One M20 Cable Entry at one End equipped with one M20 Polyamide Cable Gland

- **Mounting**

Mono Light Luminaire are easily applied as Surface mounted, Pendant, Wall Mounted and Pol/Bracket mounted

- **Options (by Order)**

Through Wiring, Looping Wiring
Extra M20 or M25 Entry
Brass made Nickel Plate Cable Gland
DALI protocol LED Driver Nickel Plated
Emergency Back Up Battery with 90 min. or 180 min. autonomy
Selection of different mounting accessories suitable for Wall Mounting, Surface or Pendant mounting, Cable Tray, Lighting Pole and Bracket, Chain-Rod

DALAHOO

weatherproof Series

- **Dalahoo**

Dalahoo Luminaires are designed to be mounted in Indoor and Parking Areas. Well design of Dalahoo enables the Customers to apply this product in Parking Places. Fine efficiency, Smooth and homogenic light Distribution, Glare control, with a quality and professional selection of fine Electrical components are just a few remarkable features of Dalahoo series.

- **Certificates**

IP65
IK08

- **Housing**

Made of Extruded Aluminum Profile with excellent resistant against heavy Mechanical and Heat Shocks.

Coating by automatic powder coating system RAL 9003

End Caps made of PMMA material

- **Diffuser**

Made of Extruded Polycarbonate Profile

Sealants made of silicon gasket with premium durability to ensure IP maintenance in life time zone

- **Electrical components**

Fine quality Constant current LED Driver, Flicker Free, – PF>0.9

Internal wiring made of PVC covered copper wires

Screwless Terminal Block made of Polycarbonate

Fine Quality SMD-LED module, nominate life time 100.000 hours at L70 with excellent efficiency

Color Temperature CCT 4000 K (6000 K as an Option by Order)

TAFTAN

Stainless steel
weatherproof Series

- **Taftan**

Taftan Luminaires are designed to be mounted in Outdoor, Industrial Areas, moisture zones, Utility areas and Sub stations.

Genius design of Taftan Light enables the Oil, Gas and Petrochemical plants to apply this product in Utility areas as well as Walkways. High efficiency, Smooth and homogenic light Distribution, Glare control, with a quality and professional selection of fine Electrical components are just a few remarkable features of Taftan series.

- **Certificates**

IP65

HIMALIA

weatherproof Series

- **Himalia**

Himalia Luminaires are designed to be mounted in Indoor, moisture zones, Parking places.

Fine design of Himalia enables the End Users to apply this product in Parking Places and Utility areas. High efficiency, Smooth and homogenic light Distribution, Glare control, with a quality and professional selection of fine Electrical components are just a few remarkable features of Himalia series.

DAMAVAND

weatherproof Series

● Damavand

Damavand Luminaires are designed to be mounted in Outdoor, Industrial Areas, moisture zones, Utility areas and Sub stations.

Perfect design of Damavand enables the Oil, Gas and Petrochemical plants to apply this product in Utility areas as well as Walkways. High efficiency, Smooth and homogenic light Distribution, Glare control, with a quality and professional selection of fine Electrical components are just a few remarkable features of Damavand series.

● Certificates

IP66
IK08

● Housing

Made of Glass-fiber re-enforced polyester (GRP) with excellent resistant against heavy Mechanical and Heat Shocks.

● Diffuser

EEx Series

Sometimes there is a misconception of Explosion proof luminaires which comes from naming convention. Some may think that Explosion Proof Luminaires are resistant to explosions. However, this is not true. Instead, it refers to a light fixture's capacity to restrain the path of sparks and prevent external ignition in hazardous areas. Metalux valued customers are invited to check upcoming pages and get information about Ex series.

VICTOR

EEx Series

• Victor

Victor Luminaires are designed to be mounted in Hazardous Areas, Zone 1 , 21 , Zone 2 , 22 specially Outdoor, Petrochemical and Refinery Areas..

Technical design of Victor enables the Oil, Gas and Petrochemical Plants to apply this product in Potentially Explosive environment, Utility areas as well as Walkways. High efficiency, Smooth and homogenic light Distribution, Glare control, with a quality and professional selection of fine Electrical components are just a few remarkable features of Victor series.

• Certificates

IP66/67
EEx d
IK08

• Housing

Made of Die Cast Aluminum with excellent resistant against heavy Mechanical and Heat Shocks.

Coating by automatic powder coating system RAL 7015
End Caps made of powder coated Die Cast Aluminum

• Cover

Made of Borosilicate tempered Glass
Diffuser made of Polycarbonate (for LED version)
Sealants made of special glues, silicone gaskets with premium durability to ensure IP and EEx maintenance in life time zone

• Electrical components

Fine quality Constant current LED Driver, Flicker Free, – PF>0.9
Internal wiring made of PVC covered copper wires
Screwless Terminal Block made of Polycarbonate
Fine Quality SMD-LED module, nominate life time 100.000 hours at L70 with excellent efficiency

Linear Series

It is of high importance to Designer Engineers to have variety of choices of Architectural lighting. Therefore, Metalux has designed and produced a type of Linear Lighting that uses extended, narrow light sources to create a linear beam of light. These fixtures are typically made of Extruded Aluminum profile and PC diffuser. They can be mounted on walls, ceilings, or floors. Beside, there is a choice of Back Light LED Panel available as general Lighting in Commercial and Administrative buildings.

SOPHIA

Linear Series

- **Sophia**

Sophia Luminaires are designed to be mounted in Indoor , Commercial and Administration Buildings. Elegant design of Sophia enables the End Users to apply this product walkway areas, Stores and Offices. High efficiency, Smooth and homogenic light Distribution, Glare control, with a quality and professional selection of fine Electrical components are just a few remarkable features of Sophia series.

- **Housing**

Made of Extruded Aluminum
Coating by automatic powder coating system RAL 9003

- **Diffuser**

Made of Polycarbonate with excellent Light transmission and glare control.

- **Electrical components**

Fine quality Constant current LED Driver, Flicker Free,
– PF>0.9
Internal wiring made of PVC covered copper wires
Screwless Terminal Block made of Polycarbonate
Fine Quality SMD-LED module, nominate life time

LED Panel Series

Outdoor lighting systems using Lighting Poles and Towers can be used most effectively to illuminate Industrial areas. Open spaces require Towers and Poles to avoid clashes with structures and process machines inside Oil, Gas, Petrochemical and Industrial plants. Pole top lighting is also maximizing space with minimal structure.

Metalux will introduce range of Lighting Poles, Brackets and Towers in the upcoming pages.

Back Light

LED Panel Series

● **Back Light**

Back Light Luminaires are designed to be mounted in Indoor, Commercial and Administration Buildings. Economic design of Back Light enables the End Users to apply this product walkway areas, Stores and Offices. High efficiency, Smooth and homogenic light Distribution, Glare control, with a quality and professional selection of fine Electrical components are just a few remarkable features of Back Light series.

● **Housing**

Made of Steel sheet
 Frame made of Extruded Aluminum
 Coating by automatic powder coating system RAL

● **Diffuser**

Made of PMMA with fine Light transmission and glare control.

Lighting Brackets and Poles Series

Outdoor lighting systems using Lighting Poles and Towers can be used most effectively to illuminate Industrial areas. Open spaces require Towers and Poles to avoid clashes with structures and process machines inside Oil, Gas, Petrochemical and Industrial plants. Pole top lighting is also maximizing space with minimal structure.

Metalux will introduce range of Lighting Poles, Brackets and Towers in the upcoming pages.

Lighting Brackets and Poles

Series

- **Body Material**

Based on several requisitions for Lighting Poles, Metalux has been busy with design and Production of Lighting Brackets and Poles for over 7 years.

This product line is well prepared to offer different length of Poles (from 0.5 meter up to 11 meter) in Polygonal or Round shape.

- **Body Material**

Made of S235 steel sheet or Pipes
Protection by Galvanization according to ASTM A123

- **Base Plate / Stiffeners / Heads and Baskets**

Made of S235 steel sheet and Pipes
Protection by Galvanization according to ASTM A123

- **Electrical components**

Service door or JB plate according to Project specification

- **Mounting**

On concrete foundation (Calculation of concrete is available on request)

- **Options (by Order)**

Junction Box and Internal Electrical components

Lighting Towers Series

Outdoor lighting systems using Lighting Poles and Towers can be used most effectively to illuminate Industrial areas. Open spaces require Towers and Poles to avoid clashes with structures and process machines inside Oil, Gas, Petrochemical and Industrial plants. Pole top lighting is also maximizing space with minimal structure. Metalux will introduce range of Lighting Poles, Brackets and Towers in the upcoming pages.

Lighting Towers

Series

- **Lighting Towers**

Based on several requisitions for Lighting Towers, Metalux has been busy with design and Production of Lighting Towers for over 5 years. This product line is well prepared to offer different length of Towers (from 12 meter up to 30 meter) in Polygonal shape. Towers come in Motorized and non-motorized baskets including Ladder and Cages.

- **Body Material**

Made of S235 steel sheet
Protection by Galvanization according to ASTM A123

- **Base Plate / Stiffeners / Heads and Baskets**

Made of S235 steel sheet and profiles
Protection by Galvanization according to ASTM A123

- **Electrical components**

Service door or JB plate according to Project specification
Control station made of powder coated steel sheets including all on-off and control devices (for motorized version)

- **Mounting**

On concrete foundation (Calculation of concrete is available on request)

- **Options (by Order)**

Junction Box and Internal Electrical components

Multi-Application Series

In almost all of Industrial areas, in both Indoor and Outdoor application, it is required to have powerful and energy efficient luminaires that are designed to provide broad and intense illumination over a large area (open areas and/or indoor job shops). Metalux has designed a Multi-Application Luminaire which can be modified to be typically used to light up outdoor areas, such as stadiums, parking lots, and building facades, or for indoor applications such as warehouses, workshops, or large halls.

ROCK ROAD

Multi-Application Series

- **Rock Road**

Rock Road Luminaires are designed to be mounted in Outdoor, Industrial Areas, moisture zones, Parking lots, Tunnels as well as warehouse, Factories, Utility areas and Sub stations.

Special design of Rock Road enables the End Users to apply this product as a multi-application for both Indoor and Outdoor areas. High efficiency, Powerful and homogenic Illumination , with a quality and professional selection of fine Electrical components are just a few remarkable features of Rock Road.

- **Certificates**

IP65
IK08

- **Housing**

Made of Die Cast Aluminum with excellent resistant against heavy Mechanical and Heat Shocks.
Coating by automatic powder coating system RAL 7015.
Frame made Die Cast Aluminum

- **Cover**

Made of Heat and Shock resistant Glass
Sealants made of special silicon gasket with premium durability to ensure IP maintenance in life time zone

- **Electrical components**

Fine quality Constant current LED Driver, Flicker Free, – PF>0.9
Internal wiring made of Flameproof covered copper wires
Screwless Terminal Block made of Polycarbonate
Fine Quality SMD-LED module, nominate life time 100.000 hours at L70 with excellent efficiency
Color Temperature CCT 4000 K (6000 K as an Option by Order)
LED lenses made of fine quality Polyamide

- **Nominated Voltage and Frequency**

220-240 V. AC
50-60 HZ
